DETAILED ACTION

1. Claims 1-31 are presented for examination.

Drawings

2. This application lacks formal drawings. The informal drawings filed in this application are acceptable for examination purposes. When the application is allowed, applicant will be required to submit new formal drawings. In unusual circumstances, the formal drawings from the abandoned parent application may be transferred by the grant of a petition under 37 CFR 1.182.

Specification

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 2651

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 2, 4, 10, 13, 14, 16, 20-22, 29-31 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Melrose et al (USPN 6,549,362).

Regarding claims 1, 4, 10, 16, 20, 22 and 29, Melrose discloses a method comprising: providing a plurality of disk drives; and automatically determining an embedded runout correction threshold for each of the disk drives on a drive-by-drive basis (see column 2 lines 58-67 and column 3 lines 1-3).

Regarding claims 2, 30 and 31, Melrose discloses that the disk drive includes a plurality of tracks and a predetermined percentage of tracks that should meet the embedded runout correction threshold is used in automatically determining the embedded runout correction threshold (see column 3 lines 12-24).

Regarding claims 13, 14 and 21, Melrose discloses that wherein the plurality of sample tracks, for which position error signal values due to repeatable runout are measured, are generally equally-spaced across a disk surface of the disk drive (see column 6 lines 26-58).

Allowable Subject Matter

6. Claims 3, 5-9, 11, 12, 15, 17-19, 23-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. Claims 27 and 28 are allowed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
